

MBA - RISK MANAGEMENT

The Risk Management Concentration within the Master of Business Administration program provides students with advanced knowledge and skills in identifying, assessing, mitigating, and managing organizational risk. Designed for students seeking leadership roles in an increasingly complex and uncertain business environment, the concentration builds upon the MBA core curriculum by examining the strategic, operational, financial, legal, and reputational risks that organizations face. Through specialized coursework, students learn to evaluate risk exposures, implement effective risk management strategies, and support organizational objectives while safeguarding assets and stakeholder interests. The concentration prepares graduates to address emerging challenges and opportunities across a variety of industries where effective risk management is essential to long-term success. Students pursuing the concentration complete the MBA core curriculum as well as four concentration-specific elective courses.
