

B.S. FORENSIC SCIENCE

Students are expected to complete at least 128 credit hours of course work and related activity in the Bachelor of Science program. This program provides both a strong core of professional courses as well as a varied liberal arts background. The goal of this degree will be to give science and criminal justice students a new educational avenue to pursue and the opportunity to qualify for entry level forensic science positions within crime laboratories, police departments and medical related fields.

The programmatic outcomes for the B.S. Forensic Science are:

1. Students will understand how forensic science fits within the criminal justice system.
2. Students will be able to process a crime scene
3. Students will apply decision-making techniques, using quantitative and qualitative analysis, and theory to forensic science issues.
4. Students will apply critical thinking to diversity issues that arise in Criminal Justice
5. Students will demonstrate leadership skills through effective written and oral communication.
6. Students will use current technology to access information, analyze and interpret data, and generate reports.
7. Students will demonstrate the ability to work with diverse colleagues in team situations.
