

# SCHOOL OF TECHNOLOGY AND INNOVATION

---

The School of Technology and Innovation prepares students to launch careers as IT professionals, positioned to develop and implement solutions that meet the needs of organizations within public and private sectors, as well as nonprofits. We embrace the fact that technology is integral to how we live while recognizing the responsibility we have to explore the relationship between technology and society.

Through our innovative programs, you'll develop core knowledge in your major. You'll "learn by doing" as you apply your skills to real-world scenarios. And perhaps most importantly, you'll gain the skills and knowledge to solve problems, create, collaborate, communicate, and polish your professionalism. These are transferable skills that will support you throughout the lifespan of your career.

The School of Technology and Innovation requires that all students, prior to graduation, complete 10 hours of community service. This service may be in support of school, college, or university activities, including, but not limited to, Open Houses, Accepted Student Days, recruiting events, group visits, and fundraising events. Hours in support of off campus community efforts can also count toward the ten hours including, but not limited to, food bank efforts, clean up campaigns, and neighborhood activities.
