Student Life

The Student Life Office offers a range of activities and services that enrich students' educational experiences at Husson University. The departments within Student Life provide engagement opportunities for students through purposeful and innovative programs that build a community for both our residential and commuter populations, promote a sense of well-being – physically, emotionally, and spiritually - foster a diverse, civil, and inclusive environment, and develop student leaders.

For more detailed information, please see the [Student Handbook](#).

Student Conduct Code

Husson University's Student Conduct Code is administered by the Student Life Office and is designed to create a civil, educational, and positive environment for students to live, study, and succeed. Husson University's mission is to inspire and prepare students for professional careers. This endeavor is a commitment to ethical and social responsibility. Students associated with Husson University are expected to be good citizens and foster a positive living and learning environment. The Student Conduct Code provides the framework for student behavior within which students are expected to live while a student at Husson University. Adherence to the Student Conduct Code is expected as a student voluntarily associates themselves with the institution. The Husson University Student Conduct Code is published on the university's website.

Commuter Student Services

The Student Life Office offers services and guidance to commuter students who may have any questions or concerns that arise. These services include commuter student-specific programming, events, and celebrations tailored to meet the needs of commuter students. Additionally, commuter students are encouraged to take advantage of all the services and opportunities offered at the University.

Student Government

The Student Government serves to represent the best interests of the student body and acts as a liaison to the University Administration. All full-time, comprehensive fee-paying students are encouraged to serve on the Student Government as Senators or Executive Board Members.

Clubs & Organizations

Over 40 student clubs and organizations operate on the Husson University campus, from professional and recreational organizations to service and academic clubs. These groups are student-driven and supported by the Student Government.

A current list of student clubs and organizations can be found on the University's website at <http://nest.husson.edu/>. New clubs are created every year based on the interests of the current student body.

Esports

Husson University Esports provides a competitive and supportive environment for student players to enter team-based video game matches against other universities. Just like other athletes, esports team members participate in drills and practices as they hone their skills to compete at the collegiate and national level.

Husson Esports' intercollegiate co-ed teams compete in the National Esports Collegiate Conference (NECC) for core-titles and Eastern Collegiate Athletic Conference (ECAC), for non-core titles.

For all students on campus, the Esports Arena open hours are 12-6pm weekdays & 2-10pm Saturday for students to hang out with friends or play a quick match. Students enjoy coming here during long breaks between classes and on the weekends for the extended open hours.

Community and Student Engagement

Within Student Life, the Community Engagement and Service initiative oversees the development of opportunities for students to engage in volunteerism, co-curricular leadership opportunities, spiritual well-being, and advocacy. These experiences enable students to enhance their community wellbeing by developing a sense of belonging, cultivating an appreciation for perspectives different from their own, and gaining a sense of ownership in the communities they are part of while realizing their leadership potential.

Residence Life

The Office of Residence Life's role is to provide a safe and engaging living environment on campus. Through efforts led by students and professional staff, each residential area establishes a unique community focused on those who reside there each year. Approximately 1,100 students live on campus every year in our residential areas. Options include the traditional halls (Bell, Carlisle, and Hart halls), suites (Darling Learning Center), and apartments (Townhouses).

Traditional Halls (Hart, Carlisle, and Bell)

The traditional halls are co-ed by floor, with mostly double rooms, some singles, triples, and quads, and a community makeup that ranges from first-year students to graduate students. The traditional halls have private, pod-style bathrooms on each floor, which are shared by those living within that community.

Suites (Darling Learning Center)

The Edward O. and Mary Ellen Darling Living & Learning Center (DLC) is a suite-style building that features classrooms and offices on the first level and student rooms on the four upper floors. The DLC is accessible via an elevator, ensuring convenient access to all floors. The community makeup ranges from second-year students to graduate students. Each suite features two separate rooms connected by a common area, which includes a sectional couch, ottoman, two Micro-Chill units, and an interior bathroom with a separate vanity area.

Townhouses

The townhouses are apartment-style units that allow students to live independently while enjoying the convenience of residing on campus. The community makeup consists primarily of seniors and graduate students. They include four private rooms, two full bathrooms, a living room, and a kitchen.

Every bedroom is furnished with a bed frame, a twin XL mattress, a desk, a chair, a wardrobe, a dresser, and a nightstand. The living room has a couch, two chairs, a coffee table, and a side table. The kitchen features high-top chairs for the breakfast bar, as well as a full-size refrigerator and oven/stove.

Provided Room Furnishings (Traditional Halls and Suites)

All double and triple rooms within traditional residence halls and suites have the same initial furnishings and amenities (exceptions may exist for quads):

- # One desk and one chair per person;
- # One dresser and one wardrobe per person;
- # One bunkable bed frame and one mattress per person;
- # Access to wireless internet;
- # One Micro-Chill® (combination unit with a freezer, fridge, and attached microwave) per room.

On-Campus Residency Requirement

All Husson University students are required to live on campus for their first two years of full-time undergraduate attendance unless they meet one or more of the following criteria:

- # Are at least 25 years of age upon the start of the semester;
- # Are married;
- # Commuting from parent(s), grandparent(s), or legal guardian(s) residence within 30 miles radius of Husson University;
- # A military veteran or current military service member

*Note: All housing and dining contracts require a board (meal) plan aside from the townhouse units, where a student can elect to forgo a board (meal) plan to utilize their provided kitchen.

Student Activities

The Student Activities Office works to enhance the student life experience by providing a wide variety of activities and programs to engage and enrich the campus community. Programming provides social, educational, and cultural opportunities. Activities are held both on and off campus and are available free or at reduced fees for students. Students are encouraged to be actively involved with the Student Activities Office by attending events, collaborating on behalf of a student organization, and volunteering at events. Advertising for Student Activities programs is available on social media and throughout campus through various media.

Wellness Center - (Student Health & Counseling Services)

The Wellness Center is designed to facilitate the academic success and retention of students by providing services and support to reach their optimal health. Well-being promotion, health education, illness prevention, and interim general integrated healthcare treatment are available to students at the Wellness Center.

The Wellness Center provides students with access to:

- Confidential counseling services
- Student health services
- General health education, consultation, and referrals
- Partnership with a local health provider to access expanded health services, including diagnostic testing, lab draws, and drop-in care

Immunization

Immunization Requirements The State of Maine (Maine Law, 22-MRSA Sec. 6359) requires certain immunizations for all students on university campuses. As such, Husson University students who are in compliance with the requirements are able to register for classes; those who are not in compliance with the State's law are not allowed to register. The required immunization requirements include:

One (1) dose of Tetanus/Diphtheria (Td or Tdap) received within the last ten (10) years.

Two (2) doses of Measles, Mumps, and Rubella (MMR) received after (not on) the first birthday. If the MMR was done prior to 1968, students must provide proof that it was done with a live virus.

Husson University highly recommends being vaccinated against the following infectious diseases: COVID-19, Meningitis, Hepatitis B, Pertussis, Varicella, and the yearly Flu.

For more information about immunization requirements and exemption options, please go to <https://www.husson.edu/student-life/campus-life/student-health-services/services/immunization-requirements>.

Student Health Insurance

All full-time students, graduates, and undergraduates are required to have health insurance coverage. Husson University applies a Student Health Insurance Plan (SHIP) to each student's account. If students are already insured by another plan, they can waive the insurance upon providing verifiable documentation of insurance coverage via their student portal. It is important to evaluate any existing insurance plans for coverage use in the State of Maine that offer services beyond emergency care only.

The University is pleased to provide Accident Insurance to our full and part-time students. The accident policy provides reimbursement for eligible medical expenses resulting from a covered accident(s) that occur during the policy period. The policy is secondary insurance, which means it fills deductibles, copays, and coinsurance for a primary insurance policy.
