HEALTH SCIENCES

The undergraduate Bachelor of Science degree in Health Sciences prepares students for careers in the healthcare industry and graduate study in professional health fields. The program gives students the flexibility to prepare for a wide range of health-focused careers as it fulfills the general requirements for entry into most graduate-level health professional programs. This allows students to tailor their degree to support their particular area of interest. The health sciences program is also a pathway for students who want to complete a graduate degree in Physical Therapy or Occupational Therapy here at Husson.

Students interested in preparing for admission to professional programs may wish to explore the following links.

Pre-Medicine

Physical Therapy

Occupational Therapy

Programmatic Outcomes

1. Students will demonstrate knowledge of fundamental biological principles.
2. Students will apply analytical reasoning in order to solve biological problems.
3. Students will demonstrate behaviors expected of an entry-level professional.
